

Fundación Universia & Wild Code School are partnering **together!** 🎉

Fundación Universia & Wild Code School are excited to announce their partnership with the aim to help students enter and excel in the tech industry.

This full scholarship program is an initiative through which students can choose a bootcamp that best suits their training needs and professional goals.

This initiative seeks to ensure that people with special needs are able to access our remote training courses and progress in the technology sector, thus increasing their opportunities to obtain quality employment.

🔍 Wild Code School is a **European school network that nurtures today's digital talent**. Their innovative approach to education equips students with the proper technical skills to succeed in [web development](#) & [data analysis](#)

🌍 Boasting **20+ campuses across 11 countries in Europe**, Wild Code School has created an expansive community of over **3,000 ambitious students** with robust technical skills, polished professional portfolios, and a network of like-minded professionals.

👩💻 Our 5-month web developer and data analyst courses train students to become tech professionals. During your training, you will learn multiple skills from 4 main areas (3 technical areas and 1 focused on soft-skills) 🧑💻
